

Mepitel One FAQ

FAQ

What is the technical difference between Mepitel One and Mepitel?

Mepitel One consists of a polyurethane film coated on one side with Safetac technology. Mepitel is a polyamide-net, coated on both sides with Safetac technology.

Is Mepitel One safe to use with EB patients?

If Mepitel One is used on Epidermolysis Bullosa patients, employ extra surveillance at dressing changes. Adhesion level of Mepitel One is somewhat higher than of Mepitel.
